I can only imagine what we're going to find out . Scott told me that a few stores had broken CII cabinets that didn't lock and never submitted a service ticket to get them fixed

Ok, guys, put your seat belts on. I had a brief hallway discussion with Scott Jonkman the other day about how these audits were going and he said they are not going great. Given this bit of news, that concerns me. We will have to get a mitigation plan together on what we will do with the results to satisfy the MOA for any non-compliance we may have seen from the audit. I do not want to miss valuable working time so as soon as we get this, I would like you guys to get started on a recommendation. I am anticipating the worst, I hope that the results are not as bad as I am thinking they will be.

This is news to me for HSRX sites, we don't require them to complete a TDGFD checklist for prescribers onsite?

Thanks

Patty

Hi Patricia

Has this been considered to update the policy to reflect the direction on HSRX and implementing the GFD checklist.

Thank you,
Justin

Justin,

AP recently conducted BCI audits. One question was on attaching T-GFD sheets in HSRX in hospitals. We do not require them to attach for doctors in the hospital. However, that is not explained in GFD policy. Can we have the policy updated or have a communication on this exception?

Thank you,
Sheila
